

WELCOME TO LIGHTHOUSE

The Lighthouse system is here to support you as you manage your life with cancer.

As you know, cancer treatment can be overwhelming. And with all types of treatment, there may be signs of side effects. But sometimes it can be hard to know what is truly a side effect. So, we're here to help.

Lighthouse was designed to support you every step of the way while you are on AstraZeneca immunotherapy. At Lighthouse, we are committed to helping you track, monitor, and report signs of side effects during treatment.

WE SHED LIGHT ON WHAT'S IMPORTANT

You're starting treatment to help manage your cancer. We offer you the support you need throughout treatment. We're looking out for you.

UNDERSTANDING YOUR SIDE EFFECTS

Immunotherapies work with your immune system. With more immune activity in your body, there is a chance that your immune system might attack healthy parts of your body.

It's important to remember that if a side effect is identified early, it may be managed before becoming more serious and possibly causing treatment to be stopped.

AS PART OF THE PROGRAM, YOU'LL GET

Access to Lighthouse
Advocates 24/7

A daily side effect
tracker, available in
print and online

Ongoing support
even if you choose to
stop treatment

Personalized
summary reports

MEET THE LIGHTHOUSE ADVOCATES

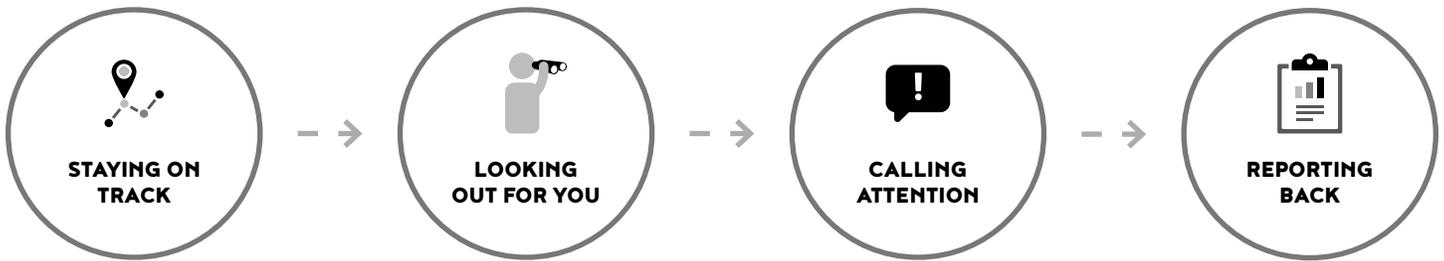

With Lighthouse, you or your caregiver will work directly with one of our Lighthouse Advocates. The Advocates are your personal guides through treatment. They receive specialized medical training to know what signs of side effects to look out for and what you should report to your doctor.

A HELPING HAND, ONE CALL AWAY

With Lighthouse, you'll be assigned a Lighthouse Advocate who can help you monitor signs of side effects and help you connect with your doctor if there is a side effect that needs his or her attention. They will not, however, contact your doctor directly. A trained Advocate will be available 24/7 at 1-855-LHOUSE1 (1-855-546-8731). You can schedule regular check-ins with your assigned Advocate that work best for your schedule.

Your Lighthouse Advocate will be familiar with any personal medical history you've shared, and give you personalized attention and answer your questions.

HOW LIGHTHOUSE WORKS

Remember, a small side effect can lead to something more serious if not treated. That's why using your tracker every day is so important.

For your convenience, a Lighthouse Advocate will always be available around the clock.

You can alert him or her about signs of side effects by phone or by using the online tracker.

After you alert a Lighthouse Advocate about any sign of a side effect you have, he or she will review the information.

Depending on what you talk about, your Lighthouse Advocate may call attention to a sign of a more serious side effect or just log the information to include in your summary report.

If you are calling attention to a sign of a side effect that is not just a part of living with cancer, your Lighthouse Advocate will get in touch with you and your caregiver and work with you to take the next step.

Communication between you and your care team is key. So to keep you all on the same page, your Advocate will create a summary report that you can share.

Remember, if a side effect is identified early, it may be managed before becoming more serious and possibly causing treatment to be stopped.

STAY CONNECTED

While on treatment, it's important to stay in touch with your Lighthouse Advocate during your regular check-in call times. Between those calls, it's important to keep track of your signs of side effects. Your Lighthouse Advocate can help take care of the rest.

FREQUENTLY ASKED QUESTIONS

Q: When is Lighthouse available?

A: There will always be a Lighthouse Advocate on call at 1-855-LHOUSE1 (1-855-546-8731) if you have questions or concerns. 24 hours a day, 7 days a week, 365 days a year. We know cancer doesn't take a vacation, so Lighthouse won't either.

Q: Will I only work with one Lighthouse Advocate?

A: For your regularly scheduled calls, you'll always work with the same Lighthouse Advocate, so he or she will be familiar with any medical history you've shared and give you the personal attention you need. If you call at a different time, you may talk to another one of our trained Advocates.

Q: Does Lighthouse have information about my type of cancer or my treatment?

A: To learn more about your specific immunotherapy treatment or your type of cancer, your best resource is your doctor.

Q: Can I participate in Lighthouse without having regular phone calls?

A: Yes. The program does not require regular calls to report signs of side effects you are having. You can do this on your own through the online tracker. Your Advocate will still monitor what you enter as a part of the program. Your Advocate will give you a call if he or she notes a sign of a side effect that needs your doctor's attention.

Q: Can I join Lighthouse if I am receiving an immunotherapy that is not made by AstraZeneca?

A: Lighthouse is only for people currently being treated, or who have been treated, with a cancer immunotherapy specifically made by AstraZeneca.

Q: How do I enroll someone with cancer into Lighthouse if I'm a caregiver?

A: You can simply visit LighthouseProgram.com/Join or call 1-855-LHOUSE1 (1-855-546-8731). It's the same process as a person treating his or her cancer would follow.

Q: What resources are available to help with the cost of my immunotherapy?

A: If you're without prescription coverage or can't afford your medication, AstraZeneca may be able to help. Access 360™ is a personal support program that can provide you with coverage support and connect you with affordability programs in your area. Learn more at myaccess360.com, or call 1-844-ASK-A360 (1-844-275-2360) Monday through Friday, 8 AM-8 PM ET.

START TRACKING TODAY

You can track signs of side effects in the following ways:

Visit LighthouseProgram.com

Download and print a paper tracker

Ask your Advocate to send you a paper tracker
